SUMMARY

MS Computer Science student at RIT with 3 years of industry experience as a Software Engineer at TCS. Focused on distributed systems, federated learning, and full-stack development. Seeking SDE internship roles where I can build scalable, high-impact systems.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, C#, SQL

ML/AI: PyTorch, Hugging Face Transformers, Federated Learning, RAG, NLP, Reinforcement Learning

Systems & Cloud: Distributed Computing, gRPC, Linux/Unix, AWS (EC2, Lambda, SQS, S3, DynamoDB, API Gateway), Docker, Terraform

Frontend & Backend: React, Spring Boot, Node.js, REST APIs, WebSockets, JWT

Databases: PostgreSQL, MongoDB, DynamoDB, Redis, Pinecone

EXPERIENCE

Research Assistant

Apr 2025 – Present

Rochester Institute of Technology

Rochester, NY

- Architected a scalable distributed ML platform on AWS EC2, orchestrating training jobs across heterogeneous clients with a custom gRPC framework and Docker-based reproducible builds.
- Engineered extensible REST APIs with JWT authentication and real-time WebSocket log streaming, enabling 5+ concurrent user workflows and improving system observability.
- Implemented zeroth-order optimization (DeComFL) achieving ~99% communication reduction; automated deployment runbooks cutting environment setup to under 2 minutes.

Software Development Engineer

Jul 2021 – Jun 2024

Tata Consultancy Services

Mumbai, India

- Migrated large-scale enterprise telecom application from jQuery to React, achieving 150% improvement in rendering performance and reducing page load time by 40% for 10M+ users.
- Engineered scalable backend APIs and data pipelines using Node.js and SQL, processing 1M+ daily transactions; built monitoring dashboards and shipped customer-facing features on tight deadlines.

PROJECTS

FedLearn Platform | *Distributed Full-Stack ML System* | GitHub

Apr 2025 – Present

- Built an end-to-end distributed ML platform enabling model training across 5+ decentralized clients; engineered heartbeat mechanisms, chunked gRPC communication, and fault-tolerant job orchestration for long-running workloads.
- Developed full-stack application with React dashboard and Spring Boot APIs to manage experiments, trigger jobs on AWS EC2, and stream real-time training logs via WebSockets.
- **Tech Stack:** Python, PyTorch, Hugging Face Transformers, Java, Spring Boot, React, AWS EC2, Docker, gRPC, PostgreSQL, Linux

DevDocBot | *AI-Powered RAG Knowledge Assistant* | GitHub

Jan 2026

- Built a production-grade RAG system to aggregate technical documentation and generate context-aware answers, deployed end-to-end on AWS serverless infrastructure.
- Designed an event-driven ingestion pipeline (GitHub Webhooks → API Gateway → SQS → Lambda) with DynamoDB caching and CloudWatch dashboards tracking latency, cache hit rate, and indexing throughput.
- **Tech Stack:** Python, AWS Lambda, API Gateway, SQS, DynamoDB, Pinecone, Hugging Face, Terraform, CloudWatch

EDUCATION

Rochester Institute of Technology

Master of Science in Computer Science

Rochester, NY

Aug 2024 – May 2027

Ramrao Adik Institute of Technology

Bachelor of Engineering in Electronics Engineering

Navi Mumbai, India

Aug 2017 – Jun 2021
